

CONCERNED ABOUT COUNTERFEIT BEARINGS?

At BDS we are too. These inferior items not only damage our business, but can ruin valuable working relationships between suppliers and customers.

WE ARE AWARE. HERE IS WHAT BDS IS DOING TO PROTECT YOU:

When you purchase a bearing from BDS, it is put through a series of specific, non-destructive tests, right here at our facility. These special tests include the following:

- **Boundary Dimension Verification**
- **Surface Finish Verification**
- **Rockwell Hardness Testing in Multiple Areas**
- **Retainer Inspections (where applicable)**
- **Relubrication (when necessary)**
- **Suspect Bearings are Destructive Tested at our sister company, BMC**

OUR COMMITMENT HELPS PROTECT BOTH OF US.

These extra measures can prevent both of us from losing business. BDS does not import bearings from the Far East, Middle East, or any third-world country. That isn't our business. With 250,000 square feet of inventory, we just don't need to. It's that simple.

COME SEE FOR YOURSELF!

We welcome our customers to visit our facilities to see these tests being performed. We are proud to confidently offer you only the best products, protecting reputations and working relationships. We want to earn your business, long-term. Providing a quality product at a fair price from stock is how we plan to keep it.
